

The heart of your  
smart parking solution

flinQ

Car Park Control & Management

Welcome on a journey through the rapidly changing world of Car Park Management. The development of this market started a few decades ago by the introduction of autonomous systems on car park access control, intercom, camera surveillance etc. At the time most suppliers expanded their parking solution on the basis of their own hardware tool. Most of the technologies in the car park systems market was (and still is) highly specialized and based upon proprietary knowledge and platforms. As a result, the client was facing an ever increasing array of stand-alone systems which became tedious and even difficult to operate.

Some 20 years ago Flexposure was the first to recognize the need for a flexible and open integration platform in order to solve the arisen operational and integration challenges. They created a 'tool' to command and visualize all autonomous and related systems in one user-friendly environment, called FlinQ.

Flexposure is always focusing on tomorrow's needs. With every new release FlinQ proves to be fully future proof. Features from the gaming industry have been adopted to optimize operator performance through high speed and rich graphics. The optimized graphical user interface and 3D maps improve situation-specific screens.

## FlinQ: always the next level of integration

## FlinQ- Controlled car parking

- ◀ a bridge between command center and parking host
- ◀ one user-friendly interface for all relevant services
- ◀ easy operation based on computer game technology
- ◀ step-by-step incident management
- ◀ 3D-style maps of exact locations

- ▶ Providers of parking facilities and their customers need parking facilities that are 24/7 available. FlinQ software builds bridges between command center users and parking hosts. Centralizing parking equipment, intercom, access control and CCTV onto one user-friendly platform maximizes control. In this way Flexposure created a fully configurable, simple and reliable management tool that works very intuitive. The FlinQ interface can be controlled just by your fingertips. The quick response times and optimal efficiency guarantee customer satisfaction.

FlinQ connects multiple devices from a parking structure and allows the user to control cameras, intercoms, access control equipment, intrusion detection and more from one interface! FlinQ improves through efficiency.

# FlinQ - independent Parking Management Platform

- ready for tomorrow's questions ◀
- control through one interface ◀
- open, brand and product independent ◀
- remote access ◀
- simple and intuitive ◀

- ▶ FlinQ is an open and flexible integration platform. FlinQ seamlessly integrates all your devices on parking access control, camera, intercom, intrusion detection and allows you to control them through one user interface. The open and accessible interface allows an easy control and unparalleled situational awareness.

If you can use a tablet or a smart phone, you will certainly feel at ease with FlinQ. The graphical user interface (GUI) combines insights from the gaming industry and touch-screen technologies and offers an innovative and intuitive approach to car parking management.

In addition, FlinQ supports remote access via mobile devices. Users can manage their systems from any location. Because of its simplicity, FlinQ does not require much training.

## FlinQ - tailor made solutions

- self-developed software by Flexposure ◀
- can be adapted seamlessly to specific situations ◀
- improves efficiency and brings down costs ◀
- centralization through one platform ◀
- open, brand and product independent ◀

- ▶ Every parking company is unique having its own needs and set of requirements. Thanks to the versatile software and the modular design, FlinQ can be adapted seamlessly to your specific situation. All software is developed inhouse by the Flexposure Software Labs, so ordering from Flexposure is ordering directly from the source. FlinQ works great on all MS-Windows platforms; an extension to Mac will follow soon. Centralization through one platform not only improves the efficiency but also helps controlling the costs.

## FlinQ - analysis

- excellent management tool ◀
- easy access to customized reports ◀
- getting new insights in parking behavior ◀
- all reports can be shared entirely ◀

- ▶ The possibilities of getting new insights in parking behavior on the basis of online analytics are almost endless. FlinQ offers a portal to provide dynamic reports, anytime, anywhere. According to your wishes, all reports from FlinQ can easily be shared. In this way a lot of (marketing, operational, service and asset management) information becomes available to improve your processes and business results.

# FlinQ - support

It goes without saying that for an optimal functioning of the FlinQ platform, adequate support is provided. The Flexposure helpdesk will give you all the support you need 24/7. Through direct connection and smart reporting capabilities we can actively monitor your systems around the clock. In this proactive manner we can even intervene before failures occur.

## Let's meet

There is much more to tell and to show you, so let us take you on a parking trip. We guarantee wonderful new views on the international world of parking. Be curious and join us. We went on this adventure with many of your colleagues and no one regretted participating. See you soon!

# FlinQ features and benefits

- Extensive integrations with: PARCS - CCTV - Intercom - Access Control
- Open architecture, brand and product independent
- Fast, efficient and intuitive single interface (multi touch)
- Adding additional sites is fast and easy
- Add additional functionalities quickly and easily
- Quick visualization of situations and response time
- Advanced 3D maps show specific situations
- Highly rated by users because of high efficiency
- Control over all PARCS functions from one single user-friendly platform
- Provides a simple and very reliable management tool
- Consistent and clear reports
